MATERIAL SAFETY INFORMATION SHEET

Voluntary material safety information sheet

according to GHS – GLOBAL HARMONISED SYSTEM, Reg. EC 1907/2006 and to Reg. EU 878/2020

| 3 | COMPOSITION / INFORMATION ON INGREDIENTS |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| 3.1 | Substances: not applicable |
| 3.2 | Mixtures: not applicable This material is an article containing abrasive substances on a specific shape of inert solid matrix |
| This abrasive article based on abrasive powders supported on an inert matrix made up of a plastic fabric and on cotton or polyester fabric with inert polymerized resin | |

Abrasive material supported and binded

| Matrix | Substance** | Hazard pictogram | Hazard classification | CAS N. | EC N. |
|------------------|--------------------------------------------------------------------------------------------------------|---------------------|-----------------------|-----------|-----------|
| | | Reg. EC 1272/2008 | Reg. EC 1272/2008 | | |
| Abrasive powders | Corundum/Aluminium oxide* Al ₂ O ₃ Reach reg. N.: 01-2119529248-35-xxxx | --- | --- | 1344-28-1 | 215-691-6 |
| | | TSCA 8(b) inventory | Listed | | |
| | | RTECS | BD1200000 | | |
| | Silicon carbide (CSi) Reach reg. N.: 01-2119402892-42-xxxx No fibers of silicon carbide are used | --- | --- | 409-21-2 | 206-991-8 |
| | | TSCA 8(b) inventory | Listed | | |
| | | RTECS | VW0450000 | | |

*: The word Corundum is defined as a natural form of alumina containing small amounts of iron, magnesium and silica impurities

Structural support

| Matrix | Structural component | Hazard pictogram | Hazard classification |
|---------|---------------------------|------------------|-----------------------|
| Support | Polyester / cotton tissue | No GHS pictogram | Not hazardous |
| | Nylon 6.6 fiber | No GHS pictogram | Not hazardous |
| Binder | Inert polymeric film | No GHS pictogram | Not hazardous |

No additional ingredients, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, meet the PBT or vPvB criteria or are considered to be of equivalent concern substances or substances which It has been assigned a workplace exposure limit and hence require reporting in this section. No nanocompounds are used

The upper limits of the ranges of concentration are excluded

Occupational exposure limits, if available, are listed in Section 8

MATERIAL SAFETY INFORMATION SHEET

Voluntary material safety information sheet

according to GHS – GLOBAL HARMONISED SYSTEM, Reg. EC 1907/2006 and to Reg. EU 878/2020

| 4 FIRST AID MEASURES | | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Premise The following recommendations are basic rules when using the abrasives applied and must be supplemented by information on the safety data sheets of the working material and any eventual refrigerant used | | |
| 4.1 | Description of first aid measures, in the case of dust projections | |
| | Eye contact | Rinse opened eye for several minutes under running water and seek immediate medical advice, showing this MSDS |
| | Skin contact | Remove contaminated clothes. Immediately wash with water and soap and rinse thoroughly. |
| | Swallowing | Drink water and seek immediate medical advice, showing this MSDS |
| | Inhalation | Supply fresh air; consult doctor in case of complaints |
| | Other informations | Immediately remove contaminated clothing |
| 4.2 | Most important symptoms and effects, acute and delayed | |
| | Potential acute health effects | No health-related episodes attributable to the product are known Eye contact: possible moderate and reversible irritation Inhalation: possible generalized malaise Skin contact: moderate and reversible irritation possible Ingestion: No known significant effects or critical hazards |
| 4.3 | Medical attention and special treatment | |
| | Threat symptomatically. If ingested or inhaled (large amounts), immediately contact a poison control center. No specific treatments are known | |
| | | |
| 5 FIRE FIGHTING MEASURES | | |
| 5.1 | Suitable extinguishing agents | This abrasive material is not flammable. Abrasives substances are not combustible. Substances of the support material contain solid fuels (type A fireworks). In the event of a fire, the following extinguishing media may be used: carbon dioxide (CO ₂ , foam, chemical powders, in the case of very large fire extinguishing even spray water spray |
| 5.2 | Unsuitable extinguishing agents for safety reasons | None of the abrasive material, to be evaluated also in the context of the general context of use, of the materials subject to abrasion processes and resulting powders |
| 5.3 | Special hazards caused by the substance and its combustion products or resulting gases | In case of fire exposed at high temperatures the present organic substances may partially decompose and burn by releasing carbon oxides and other oxidized organic compounds |
| 5.4 | Protective equipment | Use protection for the respiratory tract. Cool fire exposed containers with water |
| 5.5 | Recommendations for Fire Extinguishers | Cool with water jets containers to avoid product decomposition and the development of substances potentially hazardous to health. Always wear complete fire protection equipment. Collect extinguishing water that should not be discharged into drains. Dispose of contaminated water used for fire extinguishing and residues according to applicable regulations. Use normal fire fighting clothing such as an open-air compressor (EN 137), full flame retardant (EN469), flame retardant gloves (EN 659) and fire brigade boots (HO A29 or A30) |

| 6 | ACCIDENTAL RELEASE MEASURES | | |
| 6.1 | Personal precautions, protective equipment and procedures in case of emergency | | |
| | Person-related safety precautions | Not applicable for this abrasive article as such | |
| | Measures for environmental protection | | |
| | Additional informations | | |
| 6.2 | Methods and materials for containment and cleaning | | |
| | Measures for cleaning/collecting (small spill) | Not applicable for this abrasive article as such | |
| | Measures for cleaning/collecting (large spill) | | |
| 6.3 | Reference to other sections | | |
| | Emergency telephone numbers | See section 1 | |
| | Protection devices individual. | See section 8 | |
| | Waste treatment | See section 13 | |
| 7 | HANDLING AND STORAGE | | |
| 7.1 | Handling | <p>Wash hands thoroughly after handling the product, especially before drinking and / or eating. Avoid contact with eyes, do not breathe dust and aerosols, do not ingest.</p> <p>The product, used under the normal conditions of use recommended in the specific technical instructions, does not contain volatile compounds and does not require specific vapor capture systems, but precautions must be taken to produce dust during the abrasion process.</p> <p>Do not smoke, drink or eat during use. Provide near waterpoints.</p> <div></div> | |
| 7.2 | Storage | Store in original packaging, closed and away from sources of heat. Use appropriate storage areas. | |
| 7.3 | Specific end use(s) | Abrasive material for mechanical industry. Industrial and professional use. Do not use for other purposes | |

MATERIAL SAFETY INFORMATION SHEET

according to GHS – GLOBAL HARMONISED SYSTEM, Reg. EC 1907/2006 and to Reg. EU 878/2020

| 8 EXPOSURE CONTROLS / PERSONAL PROTECTION | | | | | | | |
|-------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|------------------------|----------------------------------------------|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Control parameters | | | | | | | |
| 8.1 | Exposure limit values (IFA_GESTIS - http://limitvalue.ifa.dguv.de/) | Component | USA OSHA 2020 TWA [mg/m ³] | | GERMANY DFG 2020 TWA [mg/m ³] | | |
| | | | Inhalable fraction | Respirable fraction | Inhalable fraction | Respirable fraction | |
| | | Silicon carbide | 15 | 5 | --- | --- | |
| | | Corundum [Al ₂ O ₃] | 15 | 5 | 4 | 1,5 | |
| | | Not classified dust | 10 mg/m ³ inhalable fraction (TWA 8 hours, ACGIH 2020) 3 mg/m ³ respirable fraction (TWA 8 hours, ACGIH 2020) | | | | |
| Hygiene and personal protective measures | | <p>For the handling and storage of abrasive material as such, no specific precautionary technical measures are required.</p> <p>During operation, refer to the operating instructions of the operating machines and the National Regulations and carefully observe the maximum operating speeds indicated. When using in mechanical machining, use a localized suction system according to the material being machined; It is preferable to have availability near an eye fountain.</p>  | | | | | |
| Exposure control (depending also on the specific abrasion process method and related materials) | | | | | | | |
| 8.2 | Respiratory protection | During use, as a result of the formation of dusts and aerosols, protect the respiratory tract by means of collective suction systems or individual devices (A-type filter mask whose class (1, 2 or 3) should be selected in relation to the limit concentration Use respirators and components tested and approved by the relevant standardization bodies, such as NIOSH (USA), CEN (US), EN 14387. If the respirator is the only means of protection, use a fully flush ventilated system (UE) | | | | | |
| | Eyes protection | During use, as a result of dust production, protect eyes with tested and approved devices according to the requirements of appropriate technical standards such as NIOSH (USA) or EN 166 (EU) | | | | |  |
| | Hands protection | Leather or PVC working gloves (EN 374) | | | | |  |
| | Thermal hazards | Not applicable in relation to the intended use. Wear heat-resistant gloves in case of thermal hazards | | | | | |
| | Skin protection | The use of protective clothing for the skin and body is not strictly necessary for normal use, but it is advisable to wear ordinary work clothing for general skin protection in relation to the use and associated risks assessed | | | | |   |
| | Other informations | Keep away from foodstuffs. Wash hands thoroughly after handling the product. Keep working clothes separately. Immediately remove contaminated clothing. Follow the local Safety Management standards and instructions. | | | | | |

MATERIAL SAFETY INFORMATION SHEET

| 9 PHYSICAL AND CHEMICAL PROPERTIES | | |
|--------------------------------------------------------------|-------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Information on basic physical and chemical properties | | |
| | Appearance | Solid abrasive material (different colours) |
| | PH | Not applicable |
| | Odour | Odourless |
| | Odour threshold | Not applicable |
| | Density at 20°C | No available data for the abrasive product |
| | Relative vapour density (dry air = 1) | No available data for the abrasive product |
| | Flash point | Not applicable for the abrasive product |
| | Melting temperature | Not applicable for the abrasive product |
| 9.1 | Boiling temperature | Not applicable for the abrasive product |
| | Self-ignition temperature | The abrasive material is not combustible. The support material has a self-ignition temperature > 300 ° C |
| | Decomposition temperature | > 250°C, with reference to the components of the support material |
| | Explosive range | No available and applicable data for the components of § 3 |
| | Comburent properties | Not applicable |
| | Vapour pressure at 20°C | Not significant for the abrasive product |
| | Water solubility | Insoluble |
| | Solvent solubility | Insoluble |
| | Partition coefficient n-octanol/water (log Pow) | No available and applicable data for the components of § 3 |
| Other informations | | |
| 9.2 | VOC (Directive 2010/75/EC) | < 0,1% |
| | VOC (volatile carbon) | < 0,1% |
| 10 STABILITY AND REACTIVITY | | |
| 10.1 | Chemical stability | The abrasive product is stable under recommended conditions of use and storage |
| 10.2 | Possibility of dangerous reactions | In contact with strong acids, strong alkaline agents, and strong oxidants may give rise to reactions |
| 10.3 | Conditions to avoid | Avoid strong and prolonged overheating, in uncontrolled conditions and with triggers |
| 10.4 | Incompatible materials | Strong acids, strong bases, and concentrated oxidants or concentrate reducing agents, which may alter product characteristics, particularly adhesive, and create safety hazards when mills are used on machines |
| 10.5 | Hazardous decomposition products | Dangerous vapors/gases such as carbon monoxide, carbon dioxide and nitrogen oxides can be produced for overheating and decomposition at temperatures above 250°C |

MATERIAL SAFETY INFORMATION SHEET

Voluntary material safety information sheet

according to GHS – GLOBAL HARMONISED SYSTEM, Reg. EC 1907/2006 and to Reg. EU 878/2020

| 11 | TOXICOLOGICAL INFORMATIONS | |
|------|--------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11.1 | Toxicological effects | |
| | Acute toxicity | The material is matrix inerted. The data refer to the abrasive substances present For this abrasive product (estimated figure based on component weight calculation) LD50 (oral) > 5000 mg / Kg |
| | | Al ₂ O ₃ (Corundum) > 5000 mg/Kg - DL50, oral rat (IUCALID Data Sheet, European Chemical Bureau) |
| | | Silicon carbide No available data |
| | Effects on eye | Based on available data, the classification criteria are not met Mechanical eye irritation: Symptoms may include irritation, redness, corneal abrasions, and tearing. The dust that forms during use can cause eye irritation |
| | Effects on skin | Based on available data, the classification criteria are not met Mechanical skin irritation: Symptoms may include itching and erythema |
| | Sensitisation | Based on available data, the classification criteria are not met |
| | Inhalation | Based on available data, the classification criteria are not met. Irritation (upper respiratory tract): Symptoms may include pain in the nose and throat, cough, sneezing. The dust that forms during use can cause irritation of the respiratory system |
| | Ingestion | Based on available data, the classification criteria are not met. Ingestion is not a probable route of exposure to this product |
| | Specific target organ toxicity (STOT) - single and repeated exposure | Based on available data, the classification criteria are not met |
| | Aspiration hazard | Based on available data, the classification criteria are not met |
| | Other adverse effects | Health risks may depend on exposure to materials subjected to abrasion processes |
| 11.2 | CMR properties | |
| | Carcinogenicity | Studies on workers with chronic exposure to the components of the abrasive product did not show carcinogenic effects for any of the components |
| | Mutagenicity | In vitro and in vivo studies carried out on the components indicate that none of the substances present in the product are genotoxic |
| | Reproductive toxicity | Based on available data, the classification criteria are not met |
| 11.3 | Other information: metabolism, kinetics, mechanism of action, effects on the endocrine system for short and long term effects | |
| | No other informations are available | |

MATERIAL SAFETY INFORMATION SHEET

Voluntary material safety information sheet

according to GHS – GLOBAL HARMONISED SYSTEM, Reg. EC 1907/2006 and to Reg. EU 878/2020

| 12 | ECOLOGICAL INFORMATION | |
|------|---------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 12.1 | Ecotoxicity | <p>Acute and chronic toxicity: based on available data the classification criteria are not met. Components of the product are not classified hazardous to aquatic environment.</p> <p>ACUTE ECOTOXICITY</p> <p>Al₂O₃ (Corundum): > 100 mg/l – 96 h, salmo trutta > 100 mg/l – 48 h, daphnia magna CSi (Silicon carbide): no available data</p> <p>CHRONIC ECOTOXICITY</p> <p>No data on chronic ecotoxicity are available for the ingredients of the product</p> |
| 12.2 | Elimination information (persistence and degradability) | <p>No information is available for this product.</p> <p>The abrasive components present are inorganic and are not biodegradable in water and soil</p> |
| 12.4 | Mobility in soil | <p>No information is available for the product.</p> <p>The substances present in the product, mentioned in § 3, do not present significant mobility in the soil.</p> |
| 12.5 | PVB, vPvB substances | <p>None of the substances present in the product is subject to the criteria for PVB or vPvB substances (Annex VIII of the REACH Regulation)</p> |
| 12.6 | Other informations | <p>No other adverse effects are known</p> |

13 DISPOSAL CONSIDERATIONS

The information in this section contains instructions and general notes. The list of identified uses in section 1 for specific information available

| | | |
|------|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 13.1 | Waste treatment methods | <p>Product</p> <p>The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by- products should at all times comply with the law on environmental protection and waste disposal legislation and the requirements of any relevant local authorities. Dispose of surplus and non-recyclable products via a licensed waste disposal. The untreated waste should not be disposed of in the sewer system unless they are not fully compliant with the requirements of each institution and legislation.</p> <p>Hazardous waste: YES (depending on the specific process and related materials)</p> <p>Packaging</p> <p>The generation of waste should be avoided or minimized wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.</p> <p>Dispose of this material and its container must be with proper precautions. Empty containers or liners may retain some product residues. Prevent drift and runoff of spilled material and contact with soil, waterways, drains and sewers</p> |
| 13.2 | European waste catalogue (EWC) | <p>For disposal within the EU is roughly from the code used by the sudden refusal to register the European Waste Catalogue (EWC)</p> |

according to GHS – GLOBAL HARMONISED SYSTEM, Reg. EC 1907/2006 and to Reg. EU 878/2020

| 14 TRANSPORT INFORMATION | | |
|---------------------------|-------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 14.1 | UN number | Not applicable |
| 14.2 | Proper shipping name | Land transport, road and rail (ADR/RID): not applicable Transport by sea (IMDG): not applicable Air transport (ICAO-TI / IATA-DGR): not applicable |
| 14.3 | Transport hazard classes | Land transport (ADR/RID): Not regulated |
| | | Transport by sea (IMDG): Not regulated |
| | | Air transport (ICAO-TI / IATA-DGR): Not regulated |
| 14.4 | Packing group | Not applicable |
| 15.5 | Environmental hazards | Land transport (ADR/RID): No Transport by sea (IMDG): No Air transport (ICAO-TI / IATA-DGR): No |
| 14.6 | Special precautions for users | Transport within the user's properties: always transport with closed containers, stored vertically and secured to the means of transport. Check the suitability of the people carrying out the transport to intervene effectively in the event of an accident and/or spill |
| 14.7 | Transport in bulk according to Annex II of MARPOL 73/8 and the IBC Code | Not applicable |
| 15 REGULATORY INFORMATION | | |
| 15.1 | Reg. 1272/2008/EC | The product does not contain substances which can be classified as carcinogenic cat. 1 or 2 under Reg. 1272/2008/EC and later updates. |
| 15.2 | Reg. 1907/2006/EC (REACH) | The product conforms to the requirements provided for in Title II of Reg. 1907/2006/EC (registration of substances) The product does not contain SVHC substances included in the candidate list of ECHA on the date of issue of this sheet. Annex XVII to Regulation 1907/2006 / EC: none |
| 15.3 | OSHA STANDARDS FOR HAZARD LABELING 1910.1200 | Applicable as abrasive article 1910.1290(C). Restrictions: none |
| 15.4 | Chemical safety assessment | For this product / article, consisting of mixtures classified as non-hazardous, chemical safety assessment has not been performed and is not applicable. All components present are used in accordance with the identified uses and the relevant and applicable scenarios (see also section 8.2) |
